## I. PENDAHULUAN

## II. TUJUAN KEGIATAN

Pada pelaksanaan ;

1. Kehidupan sosial ekonomi yang lebih baik
2. Membantu dan meringankan beban hidup dengan biaya pendidikan
3. Mempersempit kesenjangan sosial ekonomi keluarga & masyarakat
4. Menyalurkan resensitas para pekerja baru personal maupun team
5. Terjalin hubungan yang baik antar development dengan instansi perusahaan
6. Membuat bagansitas pekerja baru melewati kinerja Online ( work Home ) pekerja Rumahan berbasis Digital .
7. Memperluas , Tata ruang Usaha.

## III. RENCANA

Adapun Rencana Work Home maupun inbound dengan upaya asuransi jiwa , yang di laksanakan adalah berupa bantuan Finansial, cargo logistik / keuangan kinerja bersekala yang di laksanakan pada Hari ditentukan Hingga selesai masa Kontrak.

## IV. SUMBER DANA

Perusahaan Instasi monetasi  
Perusahan Lokal maupun interlokal  
Bisnis micro kecil dengan cangkupan estimasi  
Pembiayaan infrastructure dalam pengunjungan bagansi luar negri  
maupun dalam negri  
(place editors )

## V. SUSUNAN

TATA RUANG USAHA PERSONAL, Team Work,Public, and public figure (Bvs)

## **VI. DAFTAR NAMA-NAMA**

Daftar sebagimana pada lampiran ini

## **VII. PENUTUP**

Demikian proposal ini kami sampaikan semoga menjadi motivasi dan acuan yang bermanfaat, dalam rangka melaksanakan amanah dan transparansi pelaksanaan dan tetap menjaga Kinerja pekerja yang baik dan profesionalisme.

**BUDGET STRUCTURE AND STRATEGIC STATISTICS 2020 – 2030**  
**DATABASE ECONOMIC OUTLOOK STRUCTURE ,STRATEGIC DEPARTMENT SYLABUSS**

*An Update to the Economic Outlook: 2020 to 2030*

This report presents the baseline economic forecast that the Congressional Budget Office is using as the basis for updating its budget projections for 2020 to 2030. The agency currently plans to release those budget projections later this summer.

This economic forecast provides CBOs first complete set of economic projections through 2030 since January and incorporates information available as of June 26.1 The baseline forecast is being published now, rather than later with the budget projections, to provide the Congress with CBOs current assessment of the economic outlook in a rapidly evolving environment. This economic forecast updates the interim forecast that CBO published in May, which focused on 2020 and 2021.2 It is similar to the May forecast for those two years, except that the projection of growth in the second half of 2020 has been revised downward.

The 2020 coronavirus pandemic has brought about widespread economic disruption. To mitigate the contagion, governments, businesses, and households in the United States and around the world have taken measures to limit in-person interactions. Collectively referred to as

1. See Congressional Budget Office, The Budget and Economic Outlook: 2020 to 2030 (January 2020), [www.cbo.gov/publication/56020](http://www.cbo.gov/publication/56020). 2. See Congressional Budget Office, Interim Economic Projections for 2020 and 2021 (May 2020), [www.cbo.gov/publication/56351](http://www.cbo.gov/publication/56351).

social distancing, those measures include reducing social activities and travel, curtailing the activity of schools and business, and working from home. In the first quarter of 2020, the pandemic and associated social distancing ended the longest economic expansion and triggered the deepest downturn in output and employment since World War II.

CBO projects that if current laws governing federal taxes and spending generally remain in place, the economy will grow rapidly during the third quarter of this year. Real (inflation-adjusted) gross domestic product (GDP) is expected to grow at a 12.4 percent annual rate in the second half of 2020 and to recover to its prepandemic level by the middle of 2022. The unemployment rate is projected to peak at over 14 percent in the third quarter of this year and then to fall quickly as output increases in the second half of 2020 and throughout 2021.

Following that initial rapid recovery, the economy continues to expand in CBOs projections, but it does so at a more moderate rate that is similar to the pace of expansion over the past decade: By 2028, real GDP reaches its long-run level relative to potential GDP (the maximum sustainable output of the economy) and grows at the same rate as potential GDP thereafter.

2 An UpdAte to the economic oUtlook: 2020 to 2030 JULY 2020

The unemployment rate remains above its prepandemic level through the end of the projection period. Interest rates on federal borrowing throughout the

decade remain well below the average rates in recent decades (see Table 1). CBOs projections reflect an average of possible outcomes. For example, the pace projected for the initial rapid recovery could continue until GDP returned to its potential, or the economy could grow much more slowly. The projections are subject to an unusually high degree of uncertainty, which stems from many sources, including incomplete knowledge about how the pandemic will unfold, how effective monetary and fiscal policy will be, and how global financial markets will respond to the substantial increases in public deficits and debt. The Economic Outlook for 2020 to 2024 One major driver of CBOs forecast of the economy for the next several years is the agencys projections about how the pandemic and social distancing will unfold. CBO projects that the degree of social distancing will decline by about two-thirds from its April 2020 peak during the second half of this year, leading to an increase in social activities and commerce. That projection is in the middle of the distribution of possible outcomes, in CBOs assessment. It allows for regional and seasonal variation, and it accounts for the possibility of multiple waves of increased transmission of the virus and retightening of social distancing measures, as well as other steps people might take to protect their health while engaging in economic activity.

Another major factor underlying the economic forecast is the agencys projections of the economic effects of the four laws enacted in March and April to address the public health emergency and to directly assist affected households, businesses, and state and local governments. Those laws—which together are projected to increase the federal deficit by \$2.2 trillion in fiscal year 2020 and by \$0.6 trillion in 2021—will, in CBOs assessment, partially mitigate the deterioration in economic conditions and help spur the recovery.

From the third quarter of 2020 through the third quarter of 2021, the degree of social distancing is projected to gradually diminish to zero (even though social distancing may increase at times in some areas), and the effects of fiscal and monetary policy actions are expected to take hold. Real GDP and employment are projected to rebound quickly in response. In CBOs projections, strong GDP growth continues through 2024 but at a slower pace (see Figure 1). Meanwhile, the unemployment rate decreases from a peak of over 14 percent in the third quarter of 2020 to 5.9 percent by the end of 2024.

low-income families have borne the brunt of the economic crisis, partly because the hardest-hit industries employ low-wage workers. African American, Hispanic, and female workers have been hit particularly hard, in part because they make up a disproportionate share of the workforce in certain industries with jobs that involve elevated risks of exposure to the coronavirus. Although the labor market is expected to improve, in CBOs projections, the unemployment rate remains higher through 2030 than it was before the pandemic.

Inflation, as measured by the growth rate of the price index for personal consumption expenditures (PCE), is projected to be 0.4 percent in 2020 and to nearly reach 2.0 percent—the Federal Reserves long-run objective for inflation—by 2024. CBO expects the Federal Reserve to keep its target for the federal funds rate (the interest rate that financial institutions charge each other for overnight loans of their monetary reserves) at 0.1 percent throughout that period. In CBOs

projections, the interest rate on 10-year Treasury notes gradually rises from an average of 0.9 percent in 2020 to 1.6 percent by 2024. The Economic Outlook for 2025 to 2030 The economy continues to expand during the second half of the decade in CBOs projections. Output grows at an average annual rate of 2.1 percent over the 2025 – 2030 period – faster than the 1.8 percent average annual growth of potential output. The unemployment rate continues to drift downward, reaching 4.4 percent by the end of 2030. Inflation is stable during the 2025– 2030 period. For example, PCE price inflation averages 1.9 percent, close to the Federal Reserves long-term objective of 2 percent. Interest rates are higher in the second half of the projection period than in the first: From 2025 to 2030, the federal funds rate averages 1.1 percent; the rate on 3-month Treasury bills, 1.0 percent; and the rate on 10-year Treasury notes, 2.6 percent. labor income as a share of GDP averages 58.1 percent, which is low compared with its historical average and reflects trends that were under way before the pandemic.

#### 4 An UpdAte to the economic oUtlook: 2020 to 2030 JULY 2020

##### Figure 1 . Growth of Real GDP and Real Potential GDP, and the Output Gap

Projected

2000 2005 2010 2015 ( 2020 2025 2030)

2000 2005 2010 2015 2020 2025 2030

Percentage of Potential GDP

Percent

Real GDP Growth

Real Potential GDP Growth

Output Gap

In the second quarter of 2020, the coronavirus pandemic and associated social distancing triggered a sharp contraction in output, ending the longest economic expansion since World War II. In CBOs projections, real GDP grows rapidly in the second half of 2020 and the first half of 2021. Strong GDP growth continues thereafter but at a slower pace.

Real GDP recovers rapidly over the next several quarters in CBOs projections, rising from more than 6 percent below its potential at the end of 2020 to less than 4 percent below its potential at the end of 2021. The growth of real GDP then slows, and output remains far below its potential for several more years.

Sources: Congressional Budget Office; Bureau of Economic Analysis. Real values are nominal values that have been adjusted to remove the effects of changes in prices. Potential GDP is CBOs estimate of the maximum sustainable output of the economy. Growth of real GDP and of real potential GDP is measured from the fourth quarter of one calendar year to the fourth quarter of the next. The output gap is the difference between GDP and potential GDP, expressed as a percentage of potential GDP. A positive value indicates that GDP exceeds potential GDP; a negative value indicates that GDP falls short of potential GDP. Values for the output gap are for the fourth quarter of each year. The shaded vertical bars indicate periods of recession, which extend from the peak of a business cycle to its trough. The National Bureau of Economic Research (NBER) has determined that an expansion ended and a recession began in February 2020. Although the NBER has not yet identified the end.
